Profile summary

Experienced Specialist Programmer with over 1 year and 10 months in developing and maintaining scalable full-stack applications using React, Next.js, and Spring Boot. Proficient in designing REST APIs and robust microservices architecture for modular system design. Skilled in optimizing backend processes, enhancing application efficiency and responsiveness. Expertise in Agile development environments, collaborating with cross-functional teams for timely delivery. Strong foundation in Computer Science and Engineering (B.Tech). Demonstrated ability to build intuitive dashboards , SaaS platforms and Enterprise Applications .

Skills: Web Development, Fullstack Development, Spring Boot, Javascript, React.js, Microservices, Java, Restfull API, Agile Methodology, Code Review, Mern Stack, Postgresql, Next.js, Software Development, Tailwind CSS, Spring Batch, Camunda BPM, Software Engineering

Work experience

Specialist Programmer — Infosys	Jul 2024 - Present
- Developed and maintained scalable full-stack applications using Spring Boot and React, enhancing application efficiency and user experience. - Designed and implemented REST APIs, contributing to a robust microservices architecture for modular system design. - Optimized backend processes to significantly improve application performance and responsiveness. - Collaborated effectively with cross-functional teams in Agile environments to ensure timely delivery of production-ready features. - Participated in code reviews, promoting adherence to clean coding standards and best practices across the development team.	

Internships

— Merav Infotech	121 Days
------------------	----------

Projects

Cargo Reediness	657 Days
- Developed a robust dashboard for CMA-CGM to assess cargo container readiness for each booking, enabling swift decision-making by officers. - Implemented a notification system for booking officers to communicate missing information to stakeholders, enhancing operational efficiency. - Integrated diverse data sources from the client, organizing and presenting it through an intuitive dashboard interface. - Utilized AWS SQS queues, event-driven architecture, and Camunda for seamless automation of operational workflows. - Architected a microservices backend using Java 21 and Spring Boot, ensuring scalability and maintainability. - Employed Spring Batch for automated end date checks and other critical processes, streamlining the project workflow. - Designed a responsive frontend with React, utilizing TailwindCSS, React Query, and React Table for optimal user experience.	
SaaS Form Builder Platform	59 Days
- Built a full-stack SaaS platform enabling users to create and embed dynamic forms via script integration. - Designed backend services for form creation, submission handling, storage, and analytics tracking. - Focused on scalability and modular architecture for extensibility.	
E-Commerce Platform (E-Store)	334 Days
- Built an e-commerce platform with admin capabilities for managing products and orders. - Designed APIs to support integration with external services and custom storefronts.	

- Developed a full-stack application with authentication, image uploads, and blog features.
- Implemented REST APIs for managing user content and interactions; integrated analytics for views/downloads.

Education

B.Tech / B.E. | Computer Science and Engineering
National Institute of Engineering (NIE)
Grade - 7.3/10

2024
